

Proposal Presentation -- Assessment

Xin Huang

Team Name: *Baby Sealers*

Technical Content

	Not Acceptable	Average	Excellent
1. Explained motivation for design	1	2	3 <u>4</u> 5
2. Summarized scope of design problem	1	2	3 4 <u>5</u>
3. Presented market analysis	1	2	3 4 <u>5</u>
4. Presented customer needs analysis	1	2	3 <u>4</u> 5
5. Presented target specifications	1	2	3 4 <u>5</u>
6. Presented mission statement	1	2	3 4 <u>5</u>

Visuals or Slide Design

	Not Acceptable	Average	Excellent
1. Visual appeal of slides	1	2	3 <u>4</u> 5
2. Quality of graphs, figures and tables	1	2	3 <u>4</u> 5
3. Clear, concise supporting text	1	2	3 <u>4</u> 5

Organization of Presentation

	Not Acceptable	Average	Excellent
1. Summarized scope of talk at the beginning	1	2	3 4 <u>5</u>
2. Communicated purpose of presentation	1	2	3 4 <u>5</u>
3. Appropriate tone for audience	1	2	3 4 <u>5</u>
4. Organization of content	1	2	3 <u>4</u> 5
5. Finished with a convincing conclusion	1	2	<u>3</u> 4 5

Oral Presentation Quality

	Not Acceptable	Average	Excellent
1. Team's confidence and enthusiasm	1	2	3 <u>4</u> 5
2. Team's control of Q&A and quality of responses	1	2	<u>3</u> 4 5
3. Presentation length	1	2	<u>3</u> 4 5

Individual Assessment

Mark X in areas that are AVG. or BELOW AVG.

<i>Derick</i>	4		4		4		4		N/A
<i>Jeremy</i>	4		4		4		4		N/A
<i>Nick</i>	4		4		4		4		N/A
<i>Abin Gish</i>	4		4		4		4		3

Comments: *testing 991 not supported by 9970 at country - also need cell service component so who will pay monthly cell subscription cost*

One thing the group did particularly well: *Presented the problem effectively, message of problem is engrained. Compelling products well analyzed*

One thing that could be improved: *Better visuals and faster run through of slides. Took too long to get to system requirements & plan.*

Proposal Presentation -- Assessment

Comments: *Could have done more to explain the motivation for design focusing especially on how they plan to improve the product*

One thing the group did particularly well: *Really concise and precise market analysis and concise*

One thing that could be improved: *Stronger Intro.*

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Bi • Blend

Question 1: Which component do you think will cost the most out of your design?

Question 2: Are there any failures that could be harmful if not prevented earlier
system

Team Name: Babyseaters.

Question 1: Why only after 2008 for first product what is the limiting factor and how does your product get around this constraint

Question 2: The weight of the Arduino system? To carry around this will be heavy. Will this be wireless?

Team Name: Step Tech

Question 1: How do you doing the haptic? Also if the player is engaged in "stealth mode" will this foot sound turn off as well? If you plan to add the gravel sound as well.

Question 2: Why only 10% for gaming enthusiasts? The smallest market share? Wouldn't these be the most willing to purchase such a product?

Team Name: Wireless Neural Recorder

Question 1: Was the title of the presentation covering the bottom words purposeful?
-It covered key information

Question 2: Reliability? Are there any warning sounds or safety features if the device is disconnected or out of battery?

Team Name: _____

Question 1:

Question 2:

Proposal Presentation -- Assessment

Team Name: ~~Bob~~ *Robyentus*

Stephen Xid

Technical Content

Comments: *Good explanations on the problem and what you want to do, but maybe the organization can be revised. For example I think customer needs and market analysis should be evaluated before you come up with a design to solve a problem. One thing the group did particularly well: Did well in introducing the problem and presenting the scope of the project and how it is impactful.*

One thing that could be improved: *There was a clear distinction with how the content was organized from speaker to speaker, and some slides just listed a lot of information and wasn't the easiest to follow.*

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Compost

Question 1: When you mention that there ~~are~~ are ~~implications~~ harmful implications with burying food sludge, what are those issues? They were never brought up during the presentation and why ~~they are~~ that is not an acceptable solution.

Question 2: From the description of the product, ~~it is clear that~~ like the development of a user app, there is some power consumption. Does the amount of energy generated offset this cost?

Team Name: Babyseaters

Question 1: You mentioned that the data storage for the seat is limited on Arduino. There are other options, have you looked into this? There are ~~options that~~ are also other methods/~~for~~ program designs that should enable you to have a longer battery life (Why is the battery life for only 1 hour? It seems a little low).

Question 2: How will you cool the baby? This was not made clear during the presentation, as only one option was given and it does not seem to be sufficient.

Team Name: Omni/Immersive/Step Tech

Question 1: For customer needs like 3D Audio and Haptic Feedback, how will you measure how well you are meeting these needs? There were no metrics provided for some of these specifications.

Question 2: You focus mainly on providing feedback to the user, ~~but I~~ but I also believe that creating an immersive experience involves taking in different types of user input, like voice, not just motion. Will you guys address this?

Team Name: Hippo Riders

Question 1: You mentioned competing products. What do they provide in relation to what your goals are? What do they have that your goals do not consider?

Question 2: You mention your ~~two~~ many devices your device will solve the main issue of irregularity, so how do you propose to solve this ~~if~~ aside from the degrees of freedom mentioned.

Team Name: _____

Question 1:

Question 2:

Proposal Presentation -- Assessment

One thing the group did particularly well: Slides for the most part looked good

One thing that could be improved: Look into some of the assumptions that you are making

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Babyseaters

Question 1: How are you going to know that the driver is about to leave the child behind and set off the lights?

• Can you text 911?

Question 2: Will you be able to carry the product through the airport?

• What is the average weight of current baby carriers?

Team Name: Step Tec

Question 1: Do you think people will want an audience while they play?

Do you expect the purchasing to drop off after the first year?

1.2 B?
\$10M/yr?

Question 2:

Did you look at how many of the 1.2 billion users go to high end arcades?

Team Name: Hippo Riders

Question 1: Do you expect users or clinics to buy this?

Question 2: Do you plan to offer multiple "types" of rides?

Team Name: Epilepsy Group

Question 1: Do you expect to make \$300 M per year with this device

Question 2: How can you create a 24 hour battery with something so small (would it be better to just have an external power source)?

Team Name: _____

Question 1:

Question 2:

Proposal Presentation -- Assessment

Team Name: *Baby seaters*

Technical Content

Comments: *Good presentation; Much better rehearsed.*

One thing the group did particularly well: *The design specification were clear and metric measurements.*

One thing that could be improved: *Some of the images and graphs could be improved to add more to the presentation.*

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Baby Seater

Question 1: If the baby is left unattended for a few seconds, such as when a guardian forgets something inside the home, will your device know that this is not a risky situation.

Question 2: Will parents be ok with a text being sent to 911?

Team Name: Step Tech

Question 1: How much do you hope to incorporate haptic feedback? Differentiating between gravel and sand may be difficult.

Question 2: Are gaming enthusiasts part of the other segments, like E-Sports Players and Fans?

Team Name: Hippo Riders

Question 1: Do you think that some benefits may be attributed to interactions with horses, and if so, have you thought of ways to incorporate this.

Question 2: If this is sold at a household scale, would there be a person responsible for controlling the device?

Team Name: Wireless Neural Recorder

Question 1: What is the market share you expect to capture with your device?

Question 2: ~~How much charging does do electrical~~
Do multiple battery packs make more sense for the longevity of the device? ~~How~~

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Team Compost

Question 1: How does the generator fit in with other under the cabinet features.

Question 2: How will multi-family units work?

Team Name: Team Babysitters

Question 1: Would the ^{device be} child-proof?

Question 2: What sort of government regulations might be imposed for the auxiliary device?

Team Name: Team Hippo

Question 1: What special concerns do you have for home use?

Question 2: How is this product going to be sold? Through hospitals/therapists?

Team Name: Wireless Neural Recorder

Question 1: What would the implant process be like?

Question 2: How long does the device last?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Compost

Question 1: How will your system handle mistreatment?
For instance, pouring a bottle of vinegar could throw off the pH of the slush.

Question 2: Is there a storage tank somewhere? That all seems really inconvenient to the user for something that takes 4.5 years to pay off.

Team Name: Baby seaters

Question 1: What will you use for power? Batteries could die, but so could the car's battery.

Question 2: Why Arduino? There are better options.

Team Name: Hippo Riders

Question 1: Have you considered incorporating a VR headset?

Question 2: Will it look like a horse or be more compact?

Team Name: Wireless Neural Recorder

Question 1: Will you consider possible side-effects of putting a wireless transmitter next to an epileptic brain?

Question 2: Can the antenna be sticking out of your head like a robot?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: (Com) post-haste

Question 1: Will you guys be working and living in Europe?

Question 2: Is there any potential hazards if people throw away food they aren't supposed to?

Team Name: Babyseaters

Question 1: Wouldn't the passive cooling pad reach the car temperature after a short period of time?

Question 2: How are there 3 times as many car seats sold per year than there are births?

Team Name: Hippo Riders

Question 1: Will there be different sizes of the hippo device?

Question 2: Is the device meant for personal use or medical office use?

Team Name: Wireless Neural Recorder

Question 1: Will the patients have to go through surgery to implant the device?

Question 2: Will there be different sizes for different head sizes or will it be one size fit all?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Baby seaters

Question 1: How does pressure sensor differentiate between the weight of a child and the weight of a bag of flour?

Question 2: more than 10 phone numbers? → how many do you want?
1hr battery life seems short → what is target battery life? (ideal)

Team Name: Step Tech

Question 1: What are your plans for haptic feedback?
What currently is used?

Question 2: Very cool project. How do you plan on testing needed intensity of haptic feedback?

Team Name: Hippo Riders

Question 1: Who is the purchaser - patients?

Question 2: What weight / stresses do you think your device will need to handle.

Team Name: Wireless Neural Recorder

Question 1: What is estimated share of market value of \$300 million?

Question 2: 4mm x 4mm seems much smaller than the other devices. Is this a reasonable target value?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: (com) post-haste

Question 1:

What do the input resources cost (pH balancer, water)?
Will this affect the rate of return?

Question 2:

Will users be required to monitor the acid/base additive levels.

Team Name: Team Babysitters

Question 1:

How are you going to cool the baby?

Question 2:

How long will that cooling last?

Team Name: Step Tech

Question 1:

How exactly will haptic technology be used?

Question 2:

Will you be physically altering the texture of the tablet?

Team Name: _____

Question 1:

Question 2:

Team Name: Wireless Neuro recorder

Question 1:

How well will you fit a battery and wireless transmitter in such a small package?

Question 2:

How much do you anticipate the device costing?

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Baby Seatlers

Question 1: How does the ^{brick} cooling system get re solidified?

Question 2: What are some ideas for making the seat lighter weight?

Team Name: StepTech

Question 1: ~~How~~ What types of exergames could work with the Omni?

Question 2: Is there a way to immerse the audience too?

Team Name: Hippo Riders

Question 1: How much of Hippo therapy improvements are due to the live animal and how much is due to the saw movements?

Question 2: Are clinics going to buy this or individual users?

Team Name: ~~Externey~~ Wireless Neural Recorder

Question 1: Where will the battery go? Is it all fitting under the skin?

Question 2: How long do you expect the life time of the product to be?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: _____

Question 1: How do the useful byproducts benefit ~~customers~~ (customers directly)?

Question 2: ~~What~~ How often are some of the

Team Name: Baby Seats

Question 1: Which wireless protocol does this system use?

Question 2: ~~What~~ If the battery life is only 1 hour, does that mean that the car seat has to be constantly plugged into a power source?

Team Name: Step Tech

Question 1: ~~How~~ How do you simulate different features?

Question 2: Is there effort for different consoles?

Team Name: Hippo Rides

Question 1: How would you measure (quantify) how accurate the product reflects animal house motion?

Question 2: Is irregularities generated randomly?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Baby seaters

Question 1: Is there a way to set a specific time period after which certain numbers will be called/texted? For example, a way for the system to alert the first two numbers (maybe the parents) after 10 min, and if there is no response within an acceptable time range (~20 min?), then dial/text all, and/or other numbers.

Question 2: How do the costs of a more comfortable cooling system compare to the current "brick"?

Team Name: Step Tech

Question 1: How will you determine the maximum acceptable level of intensity?

Question 2: How did you come up with values for how much market segments are willing to pay?

Team Name: Hippo Riders

Question 1: Are there other groups currently working on creating hippotherapy devices? How do their costs/benefits compare to your solution?

Question 2: What is the specific range of cost you had in mind for your device? Where can you cut costs? (\$1500)

Team Name: Wireless Neural Recorder

Question 1: What percent of the market share are you assuming (will purchase your product)?

Question 2: Will the device be storing real-time data or directly transmitting the data as it receives it?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: (Com) post-haste

Question 1: What inputs would the user need to provide outside of food waste? (acids/bases for pH balancing?)

Question 2: How large do you expect the biobland to be?

Team Name: Team Babysitters

Question 1: Will you have different levels of alerts depending on the time/temp? (Or will all be called immediately)

Question 2: Why would you need to alert more than 10 ppl?

Team Name: Hippo Riders

Question 1: How big do you expect the device to be?

Question 2: What kind of battery life do you hope to achieve?

Team Name: Wireless Neural Recorder

Question 1: What are you communicating ~~to~~ wirelessly?

Question 2: Will wireless comm. work both ways? (Can you disable the device w/o removing the battery).

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: (Com)post-waste

Question 1: why was WSA not in the pie graph, but then your target market? I feel like it needs more justification or into pie graph. or a sentence "even though..."

Question 2: Have you looked into other apps that help people track their energy usage? They exist and people love them!

Team Name: Team Babyseaters

Question 1: Is the phase-changing cooling panel intrinsically reusable? Will it wear out over time?

Question 2: What other options exists besides phase-changing materials?

Team Name: Hippo Riders

Question 1: Will your device have electrical components + actuation?

Question 2: Would therapy be improved if quit matches humans' exactly or is there something about the horse's gait that is especially healing?

Team Name: Epilepsy

Question 1: What is your device exactly? I'm confused at the problem you're trying to solve

Question 2: What regulatory/health device standards do you need to meet?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: (com)post haste

Question 1: Do you expect any maintenance costs?

Question 2: Are there any specific harmful gasses you will have to provide safety for?

Team Name: Team Babyitters

Question 1: How do you prevent the passive cooling from starting, when there is no baby?

Question 2: Are there more comfortable alternatives than the brick?

Team Name: Immersion

Question 1: How do you plan on imitating sand, gravel surfaces?

Question 2: How does the player know their own health?

Team Name: Wireless Neural Recorder

Question 1: Would perspiration affect your product?

Question 2: How often would you have to change battery due to degradation?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: What will be people's reaction? Babysitters

Question 1:

What will be people's reaction to an auditory signal once the car is turned off?

Question 2:

What will be the failsafe? Would it make sense to send a first round of texts and if nobody replies then call 911?

Team Name: Step Tech

Question 1:

How will you ensure that the device does not injure the user with the harness?

Question 2:

Is there any other framing that can be physically simulated that are not military?

Team Name: _____

Question 1:

To what extent are the benefits of hypotherapy due to interacting with an animal?

Question 2:

Team Name: _____

Question 1:

Will the patients stay within the room for the 5 or 6 days?

Question 2:

Where will the microcontroller be ~~located~~ located?

Team Name: _____

Question 1:

Question 2:

DURING the presentation, each student is to write down ATLEAST 2 questions that they would like to ask each presenting group. These will be distributed to teams

Team Name: Progas compost - hacte

Question 1: ~~What's the size of the system~~, would it be a problem for family with a limited kitchen size? How to reach the number 0.1 m³?

Question 2: Is there a safety issue with the gas?

Team Name: Babyseaters

Question 1: In cold area, temperature can be too lower than safety range?

Question 2: How long does it take for the system ^{to respond its} baby in danger? Distinguish between real danger and present time for a sec or gas station.

Team Name: Hippo Riders

Question 1: How would device deal with the wind effect the patient see

Question 2: It's hard to generate complete random ^{is this non} motion. Is there a large period from of motion?

Team Name: Wireless Recorder

Question 1: Does this require microsurgery to implant?
